Sahan Kaveesha

Software Engineer

Programming ★★★☆☆

Design ★★★★☆

Creativity ★★★★★

About Me

A passionate Software Engineering graduate from the University of Plymouth (NSBM Green University) with interests in web development, mobile applications, game development, and artificial intelligence. Skilled in problem analysis, creative solution design, and software project coordination. Actively creating animations, educational content, and digital media through personal platforms, supported by experience in design, video editing, and digital marketing. Highly adaptable, quick to learn new domains, and motivated to contribute innovative and impactful software solutions.

Education

- **Bachelor of Science in Software Engineering** Plymouth University

- **Diploma in Software Engineering (DISE) Course** ESOFT Metro Campus

- **Full Stack Developer (UOM) Online Course** Moratuwa University

- **SLIIT Artificial Intelligence (AI) Online Course** SLIIT University

- Industry Preparation Training (IPT) Programme by NSBM & Spoken English - British Council

Job Experience

Software Systems Support & Problem Analyst (Intern)

TN Pharmacy Inc | April – December (2025) (9 Months)

- Supported and maintained the pharmacy management system by assisting with system operations, troubleshooting, issue analysis, and technical documentation to improve daily workflow efficiency. Gained hands-on exposure to pharmacy practices, medication handling, and pharmaceutical sales while supporting dispensing operations during peak periods. This role demonstrates strong analytical thinking, problem-solving skills, and the ability to quickly adapt and contribute effectively in a non-related technical domain.

Creative Technologist & Digital Content Creator

Independent / Personal Brand (@whitedevilsz) | 2022 – Present

- Developing multiple digital income streams through a YouTube channel, website, blog, and social media platforms by creating 2D and 3D animations, educational content, and creative media using software development, design, and AI-powered tools. Actively involved in web development, HTML5 and Android app/game development, digital marketing, and social media growth across YouTube, Pinterest, Facebook, and TikTok. Continuously learning and staying updated with emerging technologies including AI, blockchain, cryptocurrency, and modern software tools, reflecting strong self-learning ability, innovation, and adaptability.
